EXPERIENCE

Software Engineer Apprentice // Upstatement

APRIL 2018 – SEPTEMBER 2018 | BOSTON, MA

In a creative web design & development agency, worked on well crafted sites using agile methodology for engineering and close client communication. Utilized both headless and full-stack CMS's to build sites with tools including Javascript, Vue.js, React, CSS/SASS, and Timber for Wordpress.

Software Engineering Intern // Weebly (Square)

JULY 2017 – NOVEMBER 2017 | SAN FRANCISCO, CA

Worked with the ecommerce engineering team to both write new core features for the ecommerce user platform, and fix bugs in the existing codebase. Joined during a full stack rewrite of the service, where I contributed to building and consuming a new RESTful microservice using Laravel and Docker, and wrote new UI features with Vue / Vuex.

SKILLS

Full stack web development with **PHP, Node.js, Javascript (ES6)**
Experienced with **VueJS, React, Laravel, HTML & CSS/SASS**
Skilled in **debugging**, and good **testing** practices.

Comfortable with **UNIX/Bash, Git, Docker, Webpack & Gulp**
Practice with **RESTful API's, MySQL/Postgres**
