### Weebly / Software Engineering Intern, eCommerce

JULY 2017 - NOVEMBER 2017, SAN FRANCISCO, CA

Built out new core features to the Weebly ecommerce platform with VueJS and Vuex, on multi-squad agile team. Worked on migrating the ecommerce backend to a new containerized RESTful microservice with Laravel and MySQL.

---

### Enterprise Web Applications / Software Developer

NOVEMBER 2015 - JANUARY 2016, THE COLLEGE OF NEW JERSEY, EWING, NJ

Built the colleges' new people management applications, primarily created with PHP, JQuery, OracleSQL, and HTML/CSS.

---

## Skills

- Primary work in **PHP, Javascript, CSS/SASS, HTML**
    - Experience with **Vue** for client side applications, **Laravel** for backend
    - Practice with **debugging** on both frontend and server-side
  - Comfortable with **Git, Bash/Unix**, and building on **Apache/Nginx** stacks
  - Experience with **SQL** databases (**MySQL, Postgres**), and various **ORM/RPCs**
  - Work with **RESTful API** design, **microservice** architecture
  - Knowledge of **schema** design, **algorithms**, **discrete math**, and **boolean logic**
  - Strong interest in applying good **OOP design patterns** with **Java** or **C++**
-

### The College of New Jersey / B.S. Computer Science

AUGUST 2013 - PRESENT, EWING, NJ

---

## Recent Projects

---

### Fuzzy Tabs / JS, Chrome Extension API

INDIVIDUAL, PRESENT

A Chrome extension for effortless and snappy tab searching/switching. Emulates behavior and UI of Sublime Text's fuzzy searching algorithm.

### Trello Integration for Google Calendar / PHP, Heroku

INDIVIDUAL, PRESENT

Personal solution to enhance Google Calendar's remote URL calendar feature. Offloads server requests via Heroku that to ping calendar for changes whenever a new Trello task is added, for more real time behavior

### Statify / PHP, JS, AWS

TEAM, HACKATHON, SPRING 2016

Web app which connects to a user's Spotify library via OAuth, with an algorithm that aggregates a popularity index of your music on a relative scale
