EDUCATION

University of Massachusetts, Boston // BA, Computer Science
SEPTEMBER 2018 — expected MAY 2020 | BOSTON, MA
Relevant coursework in: Programming Languages, Discrete Mathematics, Calculus, Computer Architecture, Algorithms, Object Oriented Programming, Linear Algebra, Statistics. Worked and participated in ACM, IEEE, Mobile App Development.

EXPERIENCE

Software Engineer Apprentice // Upstatement
APRIL 2018 — SEPTEMBER 2018 | BOSTON, MA
Built websites from the bottom up with a creative team of engineers and designers, utilizing a diverse frontend tooling including Javascript, Vue.js, React, CSS/SASS, Timber, and CMS backends such as Contentful and Wordpress. Created, estimated, and delivered tasks spanning from initial development to deployment.

Software Engineering Intern // Weebly
JULY 2017 — NOVEMBER 2017 | SAN FRANCISCO, CA
Worked with the ecommerce engineering team to both write new core features for the seller platform, and make improvements on the existing codebase. Created new features using Vue / Vuex, and NPM. Contributed to rewriting code monolith into a microservice architecture, which included building an internal RESTful service using Laravel and Docker.

SKILLS

Full stack web development in **PHP, Node.js, Javascript (ES6), HTML & CSS/SASS**
Framework experience with **VueJS, React, Backbone.js, Laravel**
Skills in **debugging**, and **development testing**.
