|EXPERIENCE

Software Engineer Apprentice // Upstatement
APRIL 2018 — SEPTEMBER 2018 | BOSTON, MA

Developed websites for high profile clients in an agile environment, utilizing a diverse set of CMS backends to build frontends w/ tools including Javascript, Vue.js, React, CSS/SASS, and Timber. Worked with designers and project managers to deliver project tasks spanning from initial development to deployment.

Software Engineering Intern // Weebly
JULY 2017 — NOVEMBER 2017 | SAN FRANCISCO, CA

Worked with the ecommerce engineering team to both write new core features for the seller platform, and resolve bugs in the existing codebase. Contributed to rewriting code monolith into a microservice architecture, which involved building an internal RESTful service using Laravel and Docker. Worked on new features using Vue / Vuex, and NPM.
